## REGISTRATION REQUIREMENTS

\*To qualify for registration as a Spotted Saddle Horse, the horse must possess one spot above a level line, midway between the center of the knee and the floor of the chest and midway between the point of the hock and the center point of the stifle. If a horse has only a high stocking or an extended face marking, then it must exhibit a spot of two inches in diameter or more or the tail must exhibit contrasting color and skin of 2 inches or more. Facial markings do not count.

\*A horse must satisfy all existing qualifications for registration and must additionally be a product of either a SSHBEA registered Tobiano sire or SSHBEA registered Tobiano dam. Tobiano is defined to be a horse that has the appearance of phenotype which is indicative of a horse that has the Tobiano gene.

\*All horses must exhibit a smooth, easy saddle gait other than a trot (such as a single-foot; a running walk; a rack; a stepping pace, etc.). All horses must be inspected for their gait and color by a SSHBEA inspector or a video showing horse in motion can be submitted with application for registration.

\*Cross Breeding (mating of horses of different breeds and of grade horses) – horses being registered where there is cross breeding, the SSHBEA will require a video to be submitted with the application for registration regardless that the horse has been inspected for gait by a SSHBEA inspector. Examples of some of the other breeds: American Saddlebred, Quarter Horse, Arabians, Pintos, etc.

\*Acceptable cross breeding – Tennessee Walking horses, Racking horses and NSSHA registered horses, any other breed will require a video submitted with application for registration.
